SUMMARY

Senior IT and Software Engineering professional with 9+ years of professional experience in enterprise application development, software engineering, system architecture, business analysis, DevOps, cloud technologies, automation, data engineering, and IT operations.

Experienced throughout the software development lifecycle, including business requirements analysis, solution design, application development, system integration, database design, testing, deployment, production support, troubleshooting, and continuous improvement.

Experienced in designing and implementing microservice-based enterprise applications, REST APIs, CI/CD pipelines, deployment automation, database solutions, and integrated business systems. Strong ability to translate business requirements into practical technical solutions and coordinate with business users, technical teams, management, and other stakeholders.

Familiar with modern cloud and Microsoft enterprise technology concepts, including Microsoft Azure, SharePoint, Dataverse, Power Platform, Power Automate, Power BI, and ServiceNow. Exposure to these technologies includes conceptual understanding, self-learning, exploration, and limited hands-on use rather than extensive production implementation.

EXPERIENCE

Senior Software Developer Specialist

March 2024 - Present

PT. Indomobil Group / PT. Indomobil Sukses Internasional Tbk

Jakarta, Indonesia

- Oversee the implementation, enhancement, maintenance, and technical support of enterprise IT systems, particularly Dealer Management System (DMS) and Customer Relationship Management (CRM) applications supporting automotive business operations.
- Design and develop microservice-based application architecture for DMS initiatives, including service communication, REST APIs, database interaction, system integration, and application components.
- Analyze business requirements and translate operational requirements into technical requirements, solution designs, application components, and implementation approaches.
- Participate in technical decision-making related to application architecture, database design, system integration, development standards, and application modernization.
- Troubleshoot complex application, database, API, infrastructure, network, and integration issues across operational environments.
- Conduct application and IT-related reviews to ensure alignment with company standards, operational procedures, and industry requirements.
- Promote software engineering best practices, maintainability, automation, and standardized development approaches.
- Contributed to modernization of automotive enterprise applications through adoption of microservice-based architecture and API-driven integration.

IT Developer, Business and Automation / IT DevOps Specialist

July 2020 - February 2024

PT. Smartfren Telecom Tbk

Jakarta, Indonesia

- Managed software source code, change control, configuration management, issue tracking, build, release, deployment, and environment management within the IT Finance Division.
- Developed and maintained enterprise applications and internal systems using PHP, JavaScript, React.js, Next.js, Express.js, and Node.js.
- Designed and implemented CI/CD processes supporting application build, testing, release, deployment, and configuration activities.
- Supported development teams in establishing effective branching, merging, release management, and common-library management practices.
- Automated repetitive development, deployment, and environment-management activities to improve delivery efficiency and consistency.
- Investigated application and deployment issues, performed root-cause analysis, and coordinated corrective actions.

- Improved source-code governance and release consistency through structured branching, configuration, and change-management practices.

Software Engineer - Part-time / Freelance

June 2021 - June 2022

CV Amreta Teknodaya Nusantara

Jakarta, Indonesia

- Architected and implemented an IoT and AI-enabled application for Vannamei shrimp cultivation as part of an Agricultural Advisory System.
- Defined high-level system architecture, application components, integration requirements, and technical approaches.
- Translated domain-specific operational requirements into a structured software solution and technical architecture.
- Contributed to a technology solution combining IoT, data, AI, and application software.

IT Business Analyst

July 2018 - July 2020

PT. Smartfren Telecom Tbk

Jakarta, Indonesia

- Managed IT projects from initiation through completion, including project planning, team coordination, stakeholder identification, requirements, execution, monitoring, and closure.
- Gathered, analyzed, and documented business and system requirements from internal and external stakeholders.
- Identified operational and system issues and coordinated recommendations and corrective actions with relevant technical teams.
- Strengthened communication between business users and technical teams by translating business requirements into actionable IT requirements.

IT Data Center Development & Data Engineer

January 2016 - July 2018

Professional Human Resource

Jakarta, Indonesia

- Supervised data center maintenance and operational activities covering power, cooling, environmental conditions, physical security, and infrastructure availability.
- Led and coordinated data center technicians, engineers, and support personnel, providing technical guidance, training, and performance feedback.
- Supported 24/7 data center availability, monitoring, incident response, preventive maintenance, and operational readiness.
- Participated in disaster recovery planning, procedures, and recovery exercises.

Assistant Research - Core IT System

July 2014 - October 2014

PT. Telekomunikasi Indonesia

Bandung, Indonesia

- Supported research activities related to Software Defined Networking (SDN).
- Developed a PHP-based application supporting SDN best-practice research.
- Prepared technical findings and reports for stakeholders.

Software Engineer - R&D;

June 2013 - August 2013

PT. Telekomunikasi Indonesia

Bandung, Indonesia

- Conducted broadband penetration analysis and telecommunications business development research.
- Supported quality-control activities before and after implementation of Business Support System services and products.
- Prepared analysis and reports for project stakeholders.

EDUCATION

BINUS UNIVERSITY

April 2017 - January 2020

Jakarta, Indonesia

Master of Computer Science. GPA 3.79 / 4.00, 42 semester credit hours. Relevant coursework: Cloud Computing; Data Inference and Applied Machine Learning; Python for Data Science; Design Patterns for Software Development; Internet of Things; Software Engineering; Advanced Computing.

TELKOM UNIVERSITY

July 2011 - September 2015

Bandung, Indonesia

Bachelor of Computer Science. GPA 2.98 / 4.00, 147 semester credit hours. Relevant coursework: Data Structures and Algorithms; Software Development; Database Systems; Computer Networks; System Analysis and Design; Internet of Things.

TECHNICAL SKILLS

Languages: Go, Java, Kotlin, JavaScript, TypeScript, Python, PHP, Dart, C, C++, C#, SQL, HTML, CSS

Backend & Architecture: REST API, Microservices, Enterprise Application Development, Backend Development, System Integration, Database Application Development, Node.js, Express.js

Frontend: React.js, Next.js, Chakra UI

Mobile: Flutter, Android, Jetpack Compose

Cloud & DevOps: AWS, Google Cloud Platform, Microsoft Azure, Docker, Kubernetes, Git, GitHub, GitHub Actions, Travis CI, CI/CD, Configuration Management, Deployment Automation, Environment Management

Databases & Data: Microsoft SQL Server, MySQL, PostgreSQL, MongoDB, Firebase, Data Migration, Data Integration

Microsoft & BI: SharePoint, Power Platform, Power Automate, Dataverse, Power BI, ServiceNow, Grafana, Tableau, Qlik Sense

AI & Automation: LLM Integration, Claude API, OpenAI API, Prompt Engineering, RAG, Embeddings, Vector Search, Tool Calling, MCP, AI Agents, Workflow Automation, Anomaly Detection, AI-Assisted Development

ADDITIONAL INFORMATION

Languages: Indonesian: native / fluent. English: professional working proficiency in reading, writing, and speaking.

Awards and Honors: Tenant STP IPB+.

Professional Interests: Enterprise Application Development, Software Architecture, Cloud Computing, Artificial Intelligence, Business Process Automation, DevOps, Digital Transformation, Enterprise IT Systems, System Integration.

References: Available upon request.
